**Absolute**  
CLEANING SOLUTIONS  
Pvt.Ltd

*We build locally fabricated suspended platforms to provide competitive and sustainable solutions for exterior wall construction, decoration, cleaning and maintenance of high-rise buildings.*

# DISINFECTION SERVICE

A bacteria-free household is essential for a happy, healthy family. Cleaning with the use of a cleaner and a sponge or cloth can remove visible dirt and grime and even some germs, but it will not get rid of the whole problem. In fact, sometimes cleaning tools will only move germs from one surface to another, particularly if you use the same tools often without disinfecting after use.

***Disinfecting removes bacteria, effectively destroying a high percentage of germs and rendering them incapable of reproducing. Disinfectant is typically reserved for areas like the kitchen and bathroom but can be used throughout the home, making it an important part of your cleaning arsenal.***

# SOLAR PANEL CLEANING

Solar panels have become increasingly popular for meeting home energy needs and cleaning solar panels can improve the efficiency of solar energy systems and reduce home energy costs. The amount generated depends on the absorption of sunlight, so if solar panels are dirty, they're not as efficient—or cost-effective—as they can be.

In general, solar panels require little cleaning and maintenance in areas that receive regular precipitation. Rain can wash away much of the dirt and debris that might block a home's solar panels from absorbing the maximum amount of sunlight. However, grime can still build up over time. Especially in dry climates or near construction or industrial sites, relying on rain to keep panels clean may not be enough.

We offer our clients at all level as a general solar panel cleaner maintaining international quality standards with professional integrity and also ensuring high end quality services for our esteemed clients with full dedication and commitment.
